

ORGOFIN

Agent-as-a-Service · Company Brain · Enterprise Operating System

"The Operating System for Every Company"

One unified intelligence layer. 40+ enterprise modules. Infinite AI agents.

Confidential — Investor Vision Document

June 2025 · India · UK · USA

1. Executive Summary

ONE-LINE VISION

Orgofin is the unified Company Brain and Agent-as-a-Service (AGaaS) platform that replaces the fragmented SaaS stack with a single intelligence layer — where AI agents operate as digital employees across every business function.

Elevator Pitch

Every company today runs on 20–80 disconnected SaaS tools — Tally for accounting, Zoho for CRM, Slack for messaging, Jira for projects, Keka for HR. None of them talk to each other. Data is duplicated, decisions are slow, and AI cannot understand the full business context.

Orgofin is the antidote. We are building a unified Company Brain — a single platform where every employee, process, workflow, document, transaction, and decision lives in one interconnected graph. On top of this brain, we deploy AI agents that work autonomously across departments: hiring candidates, approving expenses, onboarding employees, reconciling GST, managing support tickets, and generating board-level reports.

We launch with Orgofin HRMS — the most complete, AI-native hire-to-retire platform built for India-first compliance — and progressively expand into Finance, CRM, CX, Collaboration, IT, and beyond, replacing entire vendor stacks with a single Orgofin subscription.

Why Now

- AI has crossed the capability threshold where autonomous agents can reliably execute multi-step business workflows — the timing for AGaaS is now.
- India's digitisation wave: GST mandates, DPDP Act, e-invoicing requirements, and UPI rails are forcing 60M+ SMEs to replace legacy tools.
- Global SMB SaaS fatigue: The average mid-market company spends \$3,500/employee/year on fragmented SaaS. Consolidation is the next megatrend.
- Foundation models (GPT-4o, Claude, Gemini) have made building context-aware agents affordable for the first time.
- Post-Zoho, no India-born player has credibly attempted a full-stack, agent-native enterprise OS.

Market Opportunity

Category	2025 TAM	2030 TAM	CAGR	India 2025
Core HRMS + Payroll	\$34.7B	\$54.8B	9–12%	\$1.37B
Finance & Accounting SaaS	\$80.2B	\$118B	8–11%	\$2.97B
CRM Software	\$82.4B	\$163.1B	14.6%	\$3.0B
Collaboration & Productivity	\$40.2B	\$57.4B	7.4%	\$1.49B
IT & Security SaaS	\$56.6B	\$104B	13–18%	\$2.1B
Data, AI & Automation	\$97.9B	\$297B	25–28%	\$3.7B
Compliance & Governance	\$13.8B	\$29.5B	16–18%	\$0.5B
TOTAL ADDRESSABLE MARKET	\$405B+	\$823B+	~15%	\$15.1B+

2. Problem Statement

The Fragmentation Crisis in Enterprise Software

The modern enterprise is built on a stack of disconnected point solutions. A typical Indian SME with 200 employees uses:

Business Function	Typical Tools Used	Annual Cost (USD)	Integration Pain
HR & Payroll	Keka / Darwinbox / Zoho People + Zoho Payroll	\$8,000–\$24,000	Manual payslips to accounting
Finance	Tally / QuickBooks / Zoho Books	\$2,400–\$12,000	No real-time CRM sync
Sales & CRM	HubSpot / Zoho CRM / Salesforce	\$12,000–\$60,000	Disconnected from support
Customer Support	Freshdesk / Zendesk	\$6,000–\$30,000	No visibility into billing
Collaboration	Google Workspace / Microsoft 365	\$12,000–\$36,000	Separate from all tools
Project Mgmt	Jira / Asana / Notion	\$3,600–\$18,000	No resource cost linkage
IT & Security	Okta / ManageEngine / Datadog	\$8,000–\$40,000	Separate user directories
TOTAL	7+ vendors, 15+ tools	\$52K–\$220K/yr	Zero unified context

The 10 Core Failures of the Current Stack

- Siloed data: Employee records live in 4 different systems with inconsistent formats.
- No organisational memory: When employees leave, knowledge disappears with them.
- Fragmented AI: Copilots in each tool have no context beyond their own data boundary.
- Manual integrations: Zapier/Make workflows break constantly and lack transactional integrity.
- Duplicate data entry: The same invoice amount is typed into 3 different systems.
- Context-switching tax: Employees spend 30–40% of their time navigating between tools.
- Compliance gaps: GST filing, PF/ESI, and DPDP compliance span multiple tools with no single audit trail.
- Slow decisions: A CEO asking 'what is our payroll cost vs revenue this month?' requires pulling data from 3 systems.
- Vendor lock-in without network effects: You're locked in but not getting smarter.

- Prohibitive total cost: A 200-person company easily spends ₹1.5Cr+ annually on fragmented SaaS.

Why Current Solutions Fail

Zoho has 55+ products but remains a collection of loosely coupled tools — not a unified brain. Each product has its own data model, UI paradigm, and AI layer. There is no shared entity graph, no cross-module reasoning, and no agentic layer that orchestrates across functions.

Microsoft 365 and Google Workspace solve collaboration but leave finance, HR, CRM, and operations entirely unaddressed — requiring yet more vendor relationships.

Salesforce, SAP, and Oracle offer integration at enterprise price points (₹50L+ implementation costs), pricing out 99% of the market.

AI copilots (Copilot for Microsoft, Einstein for Salesforce) are bolt-ons that cannot reason across the full business context — they are limited to the data silo they sit in.

THE CORE INSIGHT

Enterprise software is tool-centric. The future is company-centric. Orgofin does not build tools — it builds the brain that makes tools obsolete.

3. Our Solution

Orgofin: The Company Brain + AGaaS Platform

Orgofin is structured around three interlocking layers that work together to replace the fragmented SaaS stack:

Layer 1: Company Brain (Unified Organisational Intelligence)

The Company Brain is a living, continuously-updated knowledge graph of the entire organisation. It knows:

- Every employee: role, skills, performance history, compensation, reporting structure, compliance status
- Every customer: lifecycle, communication history, invoices, support tickets, NPS, contract terms
- Every financial transaction: mapped to cost centres, GST categories, reconciliation status
- Every document: contracts, policies, meeting notes, SOPs — indexed and semantically searchable
- Every workflow: who approved what, when, and why — with full audit trails
- Every decision: historical reasoning, outcomes, and dependencies

Unlike a data warehouse (static, batch-updated), the Company Brain is event-driven and real-time. Every action in any Orgofin module immediately updates the graph.

Layer 2: AGaaS — Agent-as-a-Service

On top of the Company Brain sits the Agent Layer. Orgofin agents are not chatbots — they are autonomous digital workers that:

- Have persistent long-term memory scoped to the organisation
- Can read, write, and execute across all Orgofin modules
- Collaborate with each other through a structured multi-agent protocol
- Learn organisational patterns and improve over time
- Can be deployed as specialised workers (HR Agent, Finance Agent, Sales Agent) or orchestrators

Layer 3: Modular Application Suite (40+ Modules)

Orgofin's 40+ modules span 8 functional suites. Each module is a best-in-class product in its category, but — unlike competitors — every module shares the same underlying data graph, authentication layer, and agent infrastructure. Adding a new module does not add friction; it adds intelligence.

V1: Orgofin HRMS — Hire to Retire, Fully Automated

Our go-to-market wedge is the most complete, AI-native HRMS built for India — and immediately relevant to UK and USA operations. Orgofin HRMS automates the full employee lifecycle:

Phase	Orgofin Module	AI Automation	India Compliance
Attract	Recruit (ATS)	AI resume scoring, interview scheduling, JD generation	—
Hire	HRMS Core + Sign	Offer letter generation, Aadhaar e-KYC, digital onboarding	Form 11 (PF), ESI registration
Manage	Attendance + Shifts	Biometric/geo-fence check-in, shift auto-scheduling, anomaly detection	Factory Act, Shops Act compliance
Pay	Payroll	Auto salary calc, TDS, PF/ESI challan, Form 16 generation	PF, ESI, PT, LWF, TDS
Develop	Performance + LMS	AI goal suggestions, continuous feedback, course recommendations	—
Retain	Analytics Dashboard	Attrition prediction, compensation benchmarking, sentiment analysis	—
Exit	HRMS Core	Clearance workflows, F&F calculation, experience letter auto-gen	PF withdrawal, gratuity calc

4. Product & Technical Architecture

4.1 The Orgofin Stack

Orgofin is built on a six-layer architecture. Each layer has a distinct responsibility and communicates with adjacent layers through well-defined contracts.

Layer	Name	Responsibility	Key Technologies
L6	Application Layer	40+ product modules (HRMS, Books, CRM, Desk, etc.)	React, Next.js, Module Federation
L5	Agent Layer (AGaaS)	Autonomous agents, multi-agent orchestration, task execution	LangGraph, AutoGen, Custom Agent Runtime
L4	Workflow Engine	Business process automation, approvals, triggers, state machines	Temporal.io, BPMN, Custom Rule Engine
L3	Company Brain	Entity graph, organisational memory, context engine, semantic search	Neo4j, pgvector, Qdrant, Knowledge Graph
L2	Data & Integration Layer	Event bus, CDC, API gateway, external connectors, iPaaS	Kafka, Debezium, Kong, Webhooks
L1	Infrastructure	Multi-tenant cloud, India/UK/US data centres, encryption, DR	AWS/GCP, Kubernetes, Terraform

4.2 Company Brain Architecture

Organisational Entity Graph

Every entity in the business — Employee, Customer, Vendor, Project, Document, Invoice, Policy, Role — is a node in a property graph. Relationships between nodes carry context: 'Employee A approved Invoice B for Project C billed to Customer D.' This cross-entity reasoning is impossible in any siloed SaaS tool.

Event Engine

Every action in Orgofin emits a structured event (e.g., EMPLOYEE_JOINED, INVOICE_APPROVED, TICKET_ESCALATED). The event stream feeds the Company Brain in real time, keeping the graph current and triggering agent workflows automatically.

Context Engine

When an agent or user asks a question, the Context Engine retrieves relevant subgraphs, recent events, and historical decisions to construct a rich prompt context. This is what enables Orgofin agents to answer questions like 'Why did our Bangalore payroll cost increase 12% last month?' without any manual data preparation.

Decision Intelligence

Over time, Orgofin learns the organisation's decision patterns — what thresholds trigger approvals, what anomalies matter, what report formats leadership prefers. This organisational learning creates a compounding intelligence moat that cannot be replicated by a new vendor.

4.3 AGaaS Architecture

Agent Registry & Marketplace

Every Orgofin agent is registered with metadata: capabilities, data access scopes, cost parameters, and SLA commitments. Customers can deploy pre-built agents from the Orgofin Agent Marketplace or configure custom agents using Orgofin's low-code agent builder.

Specialised Agents (V1-V3 Roadmap)

Agent	Function	Modules Used	Phase
HR Operations Agent	Processes onboarding, offboarding, leave approvals, payroll queries	HRMS, Payroll, Attendance, Sign	V1
Finance Agent	Reconciles bank statements, flags anomalies, generates GST reports	Books, Expenses, GST Suite	V2

Agent	Function	Modules Used	Phase
Sales Agent	Enriches leads, drafts proposals, follows up on stalled deals	CRM, CPQ, Sign, Mail	V2
Support Agent	Resolves L1 tickets, escalates L2+, updates CRM automatically	Desk, Chat, CRM, Books	V2
Compliance Agent	Monitors regulatory changes, flags violations, auto-files returns	GST Suite, Compliance Center, Payroll	V3
CEO Intelligence Agent	Daily business briefing, anomaly alerts, strategic recommendations	All modules	V3

Multi-Agent Collaboration Protocol

Orgofin agents communicate via a structured protocol: an orchestrator agent breaks down a business request into sub-tasks, delegates to specialised agents, collects results, and synthesises the final output. Human-in-the-loop checkpoints are configurable for high-stakes actions (e.g., payroll processing above ₹10L).

5. Product Suite — 40+ Modules Across 8 Families

5.1 HR & People (Orgofin HRMS Suite) — V1 Priority

The anchor suite and go-to-market wedge. India-first compliance baked in from day one.

Module	Comparable	Key Differentiator	Pricing (USD)	Status
HRMS Core	Zoho People / Keka	India PF/ESI/Gratuity native; Company Brain integration	\$2-\$8/user/mo	MVP
Attendance & Leave	Zoho People	Geo-fence + biometric; shift-linked leave; auto OT calc	+\$1-\$2/user/mo	MVP
Shift Management	Zoho Shifts	Mobile-first; payroll hooks for night diff & OT	+\$1-\$3/user/mo	MVP
Payroll	Zoho Payroll / Keka	Multi-state; auto TDS/PF/ESI; Form 16; PF challan	\$1.5-\$3/user/mo	MVP
Performance & OKRs	Zoho People	Simplified OKRs with built-in analytics	+\$2-\$4/user/mo	Future
Recruit (ATS)	Zoho Recruit / Greenhouse	AI resume match; direct onboarding pipeline	\$50-\$150/org/mo	Future
LMS	Zoho Learn / Docebo	Lightweight; payroll-linked incentives	\$50-\$200/org/mo	Future

5.2 Finance & Operations (Orgofin Books Suite)

Module	Comparable	Key Differentiator	Pricing (USD)	Status
Books (Accounting)	Zoho Books / Tally	GST-native; e-invoice IRP API; Tally migration tool	\$10–\$50/org/mo	MVP
Payroll (shared)	Zoho Payroll	Cross-linked to Books GL in real time	See HRMS	MVP
Expenses	Zoho Expense	Receipt OCR; policy compliance; linked to Books & Payroll	+\$5–\$10/user/mo	Future
Subscriptions	Zoho Subscriptions	Usage-based billing; Razorpay/Stripe connectors	\$20–\$50/org/mo	Future
Inventory	Zoho Inventory	GST-ready; Amazon/Flipkart connectors; Tally migration	\$30–\$100/org/mo	Future
Procurement	Zoho (Creator-based)	3-way matching; vendor portal; GST e-invoice	\$25–\$75/org/mo	Future
POS	Zoho Commerce + add-ons	Offline POS; GST receipt printing; Books sync	\$30/store/mo	Future
Commerce/Checkout	Zoho Commerce / Shopify	GST checkout; India payment rails native	\$15–\$50/org/mo	Future

5.3 Sales & Revenue (Orgofin CRM Suite)

Module	Comparable	Key Differentiator	Pricing (USD)	Status
CRM	HubSpot / Zoho CRM / Salesforce	WhatsApp-native; Books/Subscriptions sync; AI scoring	\$12–\$50/user/mo	Future
CPQ	Zoho CPQ / Oracle CPQ	Lightweight; tight Books integration; approval workflows	+\$10–\$15/user/mo	Future
Contracts (CLM)	Zoho Contracts / DocuSign CLM	Clause library; integrated e-sign; compliance add-ons	\$50–\$150/org/mo	Future
Sign (e-Signature)	Zoho Sign / DocuSign	Aadhaar e-KYC; HRMS+Books integration; India-first	\$10–\$25/org/mo	MVP

5.4 Support & CX (Orgofin CX Suite)

Module	Comparable	Key Differentiator	Pricing (USD)	Status
Desk (Helpdesk)	Freshdesk / Zendesk / Zoho Desk	WhatsApp-native; Books billing query integration	\$10–\$50/agent/mo	Future
Chat (Live + Bot)	Zoho SalesIQ / Intercom	AI bot + India payment integration; CRM conversion	\$15–\$40/org/mo	Future
Field Service	Zoho FSM / ServiceMax	Books/Inventory integration; India offline-first mobile	\$30–\$60/tech/mo	Future

5.5 Collaboration & Productivity (Orgofin Workspace Suite)

Module	Comparable	Key Differentiator	Pricing (USD)	Status
Mail	Google Workspace / Zoho Mail	India DC; HRMS/Books/Desk bots native	\$2-\$4/user/mo	MVP
Drive (Docs/Sheets/Slides)	Google Drive / Zoho WorkDrive	India data residency; Company Brain indexed	\$3-\$6/user/mo	Future
Meet (Video + Webinar)	Google Meet / Zoom	Low bandwidth for India; Calendar/HRMS native	\$4-\$8/user/mo	Future
Chat (Team Messaging)	Slack / Zoho Cliq	Deep Books/Desk/HRMS bots; Affordable Slack alt	\$2-\$5/user/mo	MVP
Projects	Asana / Zoho Projects	Books billing + HRMS resource mgmt integration	\$5-\$12/user/mo	Future
Sprints (Agile PM)	Jira / Zoho Sprints	Low-cost Jira alt; CRM/Desk linked	\$5-\$10/user/mo	Future
Notes/Wiki	Notion / Zoho Notebook	Company Brain indexed; Mail & Projects integrated	Free-\$3/user/mo	Future

5.6 IT & Security (Orgofin IT Ops Suite)

Module	Comparable	Key Differentiator	Pricing (USD)	Status
ITSM	ServiceNow / Freshservice	Lightweight; native Desk integration; India DC	\$20–\$40/agent/mo	Future
Remote Assist	TeamViewer / Zoho Assist	India DC; affordable SME pricing	\$10–\$20/tech/mo	Future
MDM/UEM	ManageEngine MDM / Jamf	SME-friendly; compliance focus; BYOD support	\$4–\$7/device/mo	Future
Identity & SSO	Okta / Zoho Directory	HRMS user lifecycle integration; India DC	\$3–\$6/user/mo	Future
Vault	Zoho Vault / 1Password Teams	India data residency; free tier for SMEs	Free–\$4/user/mo	Future
Backup	Veeam / ManageEngine	Simple UI; India DCs; low TCO	\$5–\$10/device/mo	Future

5.7 Data, AI & Automation (Orgofin Intelligence Suite)

Module	Comparable	Key Differentiator	Pricing (USD)	Status
Analytics (BI)	Power BI / Zoho Analytics	Pre-built HRMS/Books/CRM dashboards; GST analytics	\$25–\$200/org/mo	Future
Flow (iPaaS)	Zapier / Zoho Flow	India-first connectors (GST, PF, e-invoice)	\$15–\$50/org/mo	Future
RPA	UiPath / Automation Anywhere	Affordable; pre-built SME templates	\$50–\$200/org/mo	Future
Creator (Low-Code)	Zoho Creator / Airtable	Easy Excel/Tally migration; Orgofin API hooks	\$10–\$25/user/mo	Future
DataPrep	Talend / Zoho DataPrep	Affordable ETL; India compliance	\$50–\$200/org/mo	Future

5.8 Compliance & Admin (Orgofin Governance Suite)

Module	Comparable	Key Differentiator	Pricing (USD)	Status
e-Invoicing (GST Suite)	Zoho Books add-ons / ClearTax	Direct IRP API; e-Way Bill; Books-native	\$20–\$50/org/mo	MVP
Audit & Compliance Center	ManageEngine / Sprinto	Pre-built RBI/SEBI/IRDA templates for India	\$50–\$150/org/mo	Future
DLP	Microsoft Purview / Forcepoint	India DC; Workspace-native; BFSI focus	\$2–\$5/user/mo	Future
Policy Center	(No direct equivalent)	Integrated with HRMS for attestations	\$50–\$100/org/mo	Future
Consent & Privacy Mgmt	OneTrust / TrustArc	India DPDP Act-ready + GDPR + CCPA	\$50–\$200/org/mo	Future

6. Market Analysis

Total Addressable Market

Orgofin's TAM is defined by the aggregate addressable market of every SaaS category it enters. Given the breadth of the platform, Orgofin operates across multiple trillion-dollar software markets simultaneously.

Suite	2025 Global TAM	2030 Global TAM	CAGR	India 2025	Key Driver
HR & People	\$58.5B	\$101.9B	11-19%	\$1.95B	Digitisation of workforce mgmt
Finance & Ops	\$80.2B	\$120B	8-17%	\$2.97B	GST + e-invoice mandates
Sales & Revenue	\$96.0B	\$179B	13-27%	\$3.53B	CRM growth + e-signature boom
Support & CX	\$19.8B	\$33.2B	9-15%	\$0.73B	Omnichannel + WhatsApp
Collaboration	\$40.2B	\$57.4B	7-15%	\$1.49B	Remote work + India SMB
IT & Security	\$58.5B	\$105B	11-26%	\$2.16B	Cloud + BYOD + compliance
Data, AI & Auto	\$97.9B	\$297B	25-28%	\$3.7B	iPaaS + RPA + Low-code
DevOps & Dev	\$35.0B	\$75.3B	13-25%	\$1.28B	SaaS dev + API economy
Compliance	\$13.8B	\$29.5B	14-20%	\$0.5B	DPDP + SEBI + GDPR
TOTAL	>\$500B	>\$998B	~15%	>\$18.3B	Full-stack enterprise OS

Serviceable Addressable Market (SAM)

Orgofin's SAM in Year 1–3 is the India + diaspora-served UK/US SMB and mid-market segment (50–2,000 employees) across the HRMS + Finance + Collaboration stack. This narrows to:

- India SMB SaaS market: ~\$1.2B (2025), growing to \$3.5B by 2030
- UK Indian-diaspora and South Asian SMBs: ~\$180M
- US South Asian-owned SMBs and India-ops companies: ~\$350M
- Year 1–3 SAM total: ~\$1.73B

Serviceable Obtainable Market (SOM)

- Year 1 SOM: \$2–5M ARR (250–500 paying organisations at \$400–\$1,000 ARPU)
- Year 3 SOM: \$20–40M ARR (2,000–4,000 orgs, expanding ARPU with more modules)
- Year 5 SOM: \$100–200M ARR (full-suite adoption, AGaaS usage revenue, marketplace)

Customer Segments & Geographic Strategy

Segment	Size Range	Primary Pain	Entry Product	ARPU Target
India Tech SMBs	50–500 emp	Tally + Excel + Keka fragmentation	HRMS + Payroll + Books	\$400–\$2,000/mo
India Manufacturing	100–2,000 emp	Shift mgmt, PF/ESI compliance, POS	HRMS + Payroll + Inventory	\$600–\$3,000/mo
India D2C/eCom	20–200 emp	Commerce + Inventory + Subscriptions	Books + Commerce + CRM	\$300–\$1,500/mo
UK South Asian SMBs	20–500 emp	India ops + UK payroll compliance	HRMS + Books (Multi-entity)	\$500–\$3,000/mo
US India-ops Companies	50–1,000 emp	India subsidiary HR/Finance mgmt	HRMS + Books	\$800–\$5,000/mo
BFSI (India)	100–5,000 emp	Compliance + Audit + Identity + DLP	Compliance Suite + HRMS	\$2,000–\$15,000/mo

7. Competitive Analysis

The Competitive Landscape

The enterprise software market is dominated by incumbents who built their products in the pre-AI, pre-graph era. Their architectures — and their business models — are fundamentally incompatible with the unified brain paradigm.

Competitor	Strength	Fatal Weakness vs Orgofin	Orgofin Advantage
Zoho (45+ tools)	Breadth, India pricing, SMB familiarity	No unified data graph; tools remain siloed; no real AGaaS layer; weak compliance	True unified brain; AGaaS layer; India compliance-first; better UX
Salesforce	CRM depth, enterprise trust, Einstein AI	Extremely expensive (\$150–\$300/user); poor India SMB fit; AI is CRM-only	10x cheaper; full-stack; India-native; agents cross all functions
SAP / Oracle	ERP depth, compliance, global scale	₹50L+ implementation; SMB-hostile; monolithic; AI is an afterthought	Self-serve; SMB-first; agent-native; 100x faster to deploy
Microsoft 365 + Copilot	Productivity suite dominance; Copilot AI	Only covers collaboration; Copilot is document-centric, not business-process-aware	Business-process agents; full HR/Finance/CRM coverage; India-specific
Freshworks (Desk/CRM/HR)	India heritage, SMB pricing, pleasant UX	Not truly unified; no Company Brain; limited AI; no Finance/compliance modules	Deeper integration; Company Brain; AGaaS; GST/compliance native
Darwinbox / Keka	Strong India HRMS, good UX, growing fast	HRMS only; no Finance/CRM/IT; no AGaaS; no Company Brain	Full-stack; agents replace manual workflows; more modules, same price
Rippling (US)	Brilliant unification model; strong IT+HR	US-only; expensive; no India compliance; no India market strategy	India-first; full compliance; global expansion from India base
Notion / Glean	Knowledge mgmt, AI search	No transactional modules; no HR/Finance/CRM; AI is search-only	Company Brain goes beyond search — it

Competitor	Strength	Fatal Weakness vs Orgofin	Orgofin Advantage
			executes, not just retrieves
HubSpot	Best-in-class CRM UX, strong inbound	CRM-only; expensive at scale; no India compliance; no unified brain	Full-stack; 5x cheaper at equivalent headcount; India-native

THE FUNDAMENTAL DIFFERENCE

Every competitor builds products and then tries to connect them. Orgofin builds the brain first, and the products emerge from it. This architectural inversion is our most defensible moat.

8. Business Model & Pricing

Revenue Streams

- SaaS Subscriptions (Core): Per-user/per-org monthly subscriptions across all modules
- AGaaS Usage Pricing: Per-agent-task or per-1,000 agent actions — the AI meter that grows with usage
- Agent Marketplace: 30% revenue share on third-party agents and templates
- Professional Services: Implementation, migration (Tally/Keka/Zoho), and custom configuration
- Compliance & Data Services: India-specific filings, e-invoice API access, GST reconciliation runs
- Partner Channel: Revenue share with CA firms, IT resellers, and HR consultants in India

Pricing Tiers

Plan	Target	Modules Included	Price Point	AGaaS
Starter	SMBs <50 employees	HRMS Core + Payroll + Attendance + Mail + Chat + Books	\$99-\$199/org/mo flat	100 agent tasks/mo
Growth	SMBs 50-200 emp	Starter + CRM + Desk + Drive + Projects + Sign + GST Suite	\$5-\$8/user/mo	500 agent tasks/mo
Business	Mid-market 200-1,000	Growth + Analytics + Flow + ITSM + Compliance + LMS	\$10-\$15/user/mo	2,000 agent tasks/mo
Enterprise	>1,000 employees	Full suite + Custom agents + SLA + Dedicated CSM	Custom / ₹15L+ ACV	Unlimited
AGaaS Add-on	Any plan	Additional agent capacity	\$0.05-\$0.10 per task	Pay-as-you-go

Unit Economics (Target at Scale)

Metric	Year 1 (Target)	Year 3 (Target)	Year 5 (Target)
Average Contract Value (ACV)	\$4,800	\$12,000	\$36,000
Gross Margin	65%	72%	78%
Payback Period	18 months	12 months	8 months
Net Revenue Retention (NRR)	105%	115%	125%
CAC (blended)	\$1,200	\$2,400	\$3,600
LTV (5-year)	\$22,000	\$64,000	\$180,000
LTV:CAC Ratio	18x	27x	50x

9. Go-to-Market Strategy

Phase 1: India HRMS Wedge (Months 1–12)

Launch Orgofin HRMS as the definitive Keka/Darwinbox/Zoho People alternative for India tech startups, IT services firms, and SMBs. The wedge is irresistible: full India compliance (PF/ESI/TDS/Gratuity) + AI automation + pricing that undercuts competitors by 30–50%.

- ICP: India tech companies, IT services firms, BPOs, and manufacturing SMBs with 50–500 employees
- Channel 1 — Direct: Founder-led sales, LinkedIn, product-led self-serve for <100 emp
- Channel 2 — CA/CS Partner Network: India has 350,000 Chartered Accountants. Partner with CA firms to resell Orgofin to their SME clients (30% referral commission)
- Channel 3 — HR Consultants: Partner with payroll processing firms and HR outsourcing companies transitioning clients to SaaS
- Content: India HR compliance content (PF calculator, TDS calculator, Form 16 generator) → SEO → PLG funnel
- Community: Partner with NHRD, SHRM India, and startup ecosystem (YourStory, Inc42, Nasscom)

Phase 2: Expand to Finance + CRM (Months 12–24)

Once HRMS is entrenched, cross-sell Books + Payroll (single ledger for HR costs) and CRM (sales team alignment). The pitch becomes: 'Stop paying Tally AND Zoho Books AND Keka separately — one Orgofin subscription covers all three.'

Phase 3: UK & US Expansion (Months 18–36)

Target UK South Asian SMBs and companies with India operations. Unique positioning: Orgofin is the only platform that handles India subsidiary compliance (PF/GST) and UK/US operations in a single interface. No competitor offers this.

Phase 4: Enterprise & AGaaS Upsell (Year 3+)

As the Company Brain accumulates organisational intelligence, Orgofin becomes invaluable — and the AGaaS usage meter drives accelerating revenue. Enterprise accounts are won through compliance mandates (BFSI, healthcare) and developer credibility (DevOps suite for tech firms).

Ideal Customer Profile — V1

Attribute	Description
Company Size	50–500 employees; rapid growth phase
Industry	Tech/SaaS, IT Services, D2C, Manufacturing, BFSI
Geography	India (Tier 1 + Tier 2 cities); UK (London, Birmingham, Leicester); USA (Bay Area, NYC, NJ, Texas)
Tech Maturity	Currently using Tally + Excel + Keka or Zoho individual products; frustrated with fragmentation
Decision Maker	Founder/CEO (companies <100), CFO + HR Head (companies 100–500)
Key Pain	GST/PF/ESI compliance burden; no unified employee + financial data; paying 5+ vendors
Willingness to Pay	\$200–\$2,000/mo; ROI clear if saves even 1 FTE of manual work

10. Competitive Moats & Defensibility

Moat 1: Organisational Memory (Compounding Intelligence)

The Company Brain learns the specific patterns of each organisation over time — approval thresholds, reporting preferences, seasonal payroll anomalies, customer churn triggers. This organisational memory cannot be replicated by a new vendor without months of re-learning. The longer a customer uses Orgofin, the smarter it gets, and the more painful it becomes to leave.

Moat 2: Data Network Effects

As Orgofin aggregates anonymised, aggregated business data across thousands of Indian SMBs, it builds proprietary benchmark datasets: industry-specific payroll benchmarks, GST compliance rates, HR attrition patterns. These datasets fuel better AI agents and cannot be replicated by single-tool vendors.

Moat 3: India Compliance Depth

Building true India compliance — direct IRP API for e-invoicing, PF/ESI challan generation, Form 16/24Q, multi-state payroll, Aadhaar e-KYC, DPDP Act compliance — requires months of regulatory engineering and ongoing maintenance. This is a significant barrier. No Western player (Salesforce, SAP, Rippling) can replicate this without a major India-specific engineering investment.

Moat 4: Ecosystem Lock-in Without Hostility

Unlike legacy ERP vendors, Orgofin's lock-in is value-driven, not contract-driven. As customers add more modules, their data becomes more interconnected, and the switching cost rises naturally — not because of penalties or proprietary formats, but because the Company Brain has become genuinely indispensable.

Moat 5: Agent Learning Loops

Every time an Orgofin agent executes a task (approves a leave request, reconciles a bank statement, resolves a support ticket), it learns from the outcome. Over thousands of such interactions, Orgofin agents become significantly more accurate and autonomous than a competitor's generic AI copilot. This reinforcement creates a widening capability gap over time.

Moat 6: CA/CS Partner Network

India's CA and CS ecosystem serves as both a distribution channel and a compliance data source. Once Orgofin is embedded in a CA firm's workflow (using Orgofin to manage client GST filings), the CA becomes an Orgofin sales force. This community-driven distribution is extremely difficult for a foreign competitor to replicate.

11. Long-Term Vision — The Operating System for Companies

THE 10-YEAR VISION

Just as Windows became the OS for personal computers and iOS became the OS for mobile, Orgofin is becoming the Operating System for companies — the layer through which every business process, every decision, and every employee interaction flows.

The Evolution Roadmap

Horizon	Timeline	Milestone	Revenue Target
H1: HRMS Wedge	0-12 months	Best HRMS in India; 500+ customers; AI-native payroll-to-retire	\$2-5M ARR
H2: Full-Stack SMB OS	12-36 months	HRMS + Finance + CRM + Desk + Workspace live; 3,000+ customers; UK/US launched	\$20-40M ARR
H3: AGaaS Platform	36-60 months	Agent Marketplace live; 10,000+ customers; AGaaS is >30% of revenue	\$100-200M ARR
H4: Company Brain as Platform	5-8 years	Third-party developers build on Orgofin's Company Brain API; ecosystem of 10,000+ agents	\$500M+ ARR
H5: Enterprise OS	8-12 years	Orgofin is the default OS for mid-market companies globally; IPO or strategic exit	\$1B+ ARR

The Ultimate State: Company Brain at Scale

In the ultimate state, Orgofin does not look like software. It looks like intelligence. A CEO wakes up and Orgofin's CEO Intelligence Agent has already:

- Flagged that payroll cost in Hyderabad increased 11% — traced to 3 new hires approved last Tuesday in the ATS
- Noticed that a key enterprise customer hasn't logged a support ticket in 6 weeks (unusual — churning?) and drafted an outreach email for the Account Manager
- Identified that the Bangalore warehouse has 23 days of inventory remaining for SKU-447 — and raised a draft PO to the preferred vendor
- Prepared the board presentation for Thursday using actual data — no manual slides needed
- Detected that Employee ID 1042 has not completed mandatory POSH training — and sent a reminder with a deadline

This is not a chatbot. This is a company that runs on intelligence. That is Orgofin.

Orgofin's Enduring Promise

We are not building another SaaS tool. We are building the last platform a company will ever need — a brain that grows smarter with every employee hired, every invoice raised, every customer served, and every decision made.

The fragmented SaaS era is ending. The Company Brain era is beginning. Orgofin is that brain.

Appendix: Summary Metrics Dashboard

Orgofin at a Glance

Dimension	Detail
Company Name	Orgofin
Category	AGaaS (Agent-as-a-Service) + Company Brain + Enterprise SaaS OS
V1 Product	HRMS Suite — Full hire-to-retire AI automation, India-first compliance
V1 Status	MVP — HRMS Core, Payroll, Attendance, Shifts, Mail, Chat, Books, e-Invoice, Sign
Target Customer (V1)	India tech/IT/manufacturing SMBs, 50–500 employees
Geography (V1)	India → UK → USA
Funding Stage	Pre-seed / Seed raise
Core Differentiators	Company Brain (unified graph), AGaaS (autonomous agents), India compliance depth, full-stack (not point solution)
Total Modules Planned	40+ across 8 functional suites
TAM (Full Suite)	\$500B+ (2025), \$1T+ (2030)
SAM (V1–V3)	\$1.73B across India + UK + US target segments
Revenue Model	SaaS subscriptions + AGaaS usage billing + Marketplace + Professional services
Key Competitors	Zoho, Keka, Darwinbox, Freshworks, Tally — none with unified brain + AGaaS layer
Primary Moat	Organisational memory + India compliance depth + Agent learning loops + CA partner network
